## WORM GEARBOXES NVH / NVS

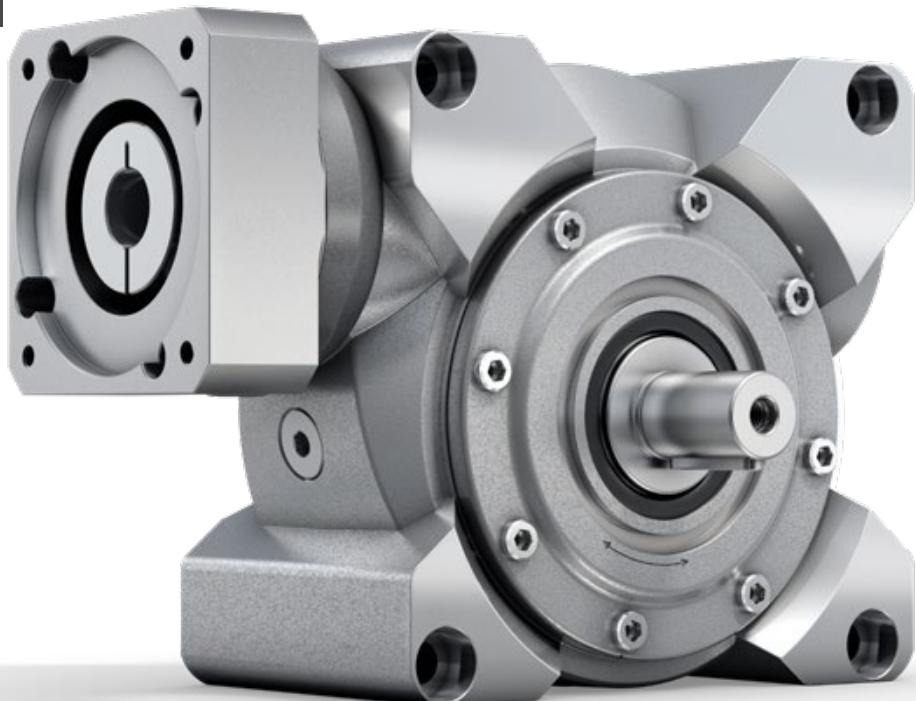

This product line is characterized by high power density, medium backlash over the entire service life, and supreme running smoothness. The gearboxes are also ideal for use in continuous operation thanks to their low temperature development.

NVH

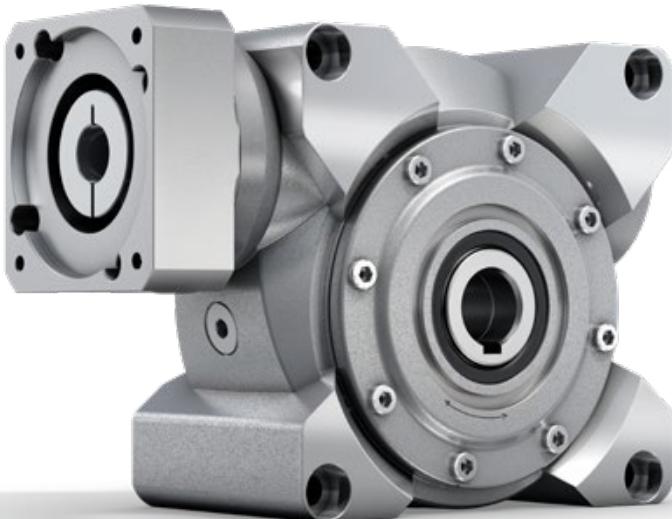

NVS

# NVH / NVS – We drive the Performance

NVH

The servo worm gearboxes with hollow shaft and output shaft impress with high power density combined with medium backlash. The V-Drive Value are especially suitable for economical applications in continuous operation.

## PRODUCT HIGHLIGHTS

### Strong performance

The V-Drive Value convinces with a strong performance in economical standard applications in cyclic and continuous operation. High power density is achieved with medium backlash over the entire service life.

### No stick-slip effect

The stick-slip effect is not an issue in applications with the V-Drive Value thanks to the perfected hollow-flank toothings.

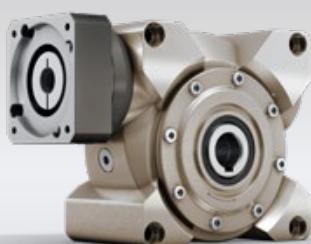

### High flexibility

In addition to the hollow shaft and shaft output shapes, the worm gearboxes are also available in a corrosion-resistant design.

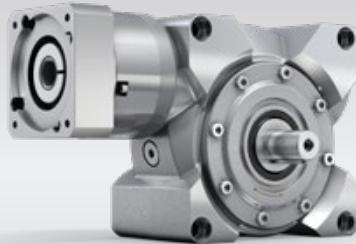

### Constant low backlash

Constant low backlash over the entire service life affords consistent high quality with high positioning accuracy.

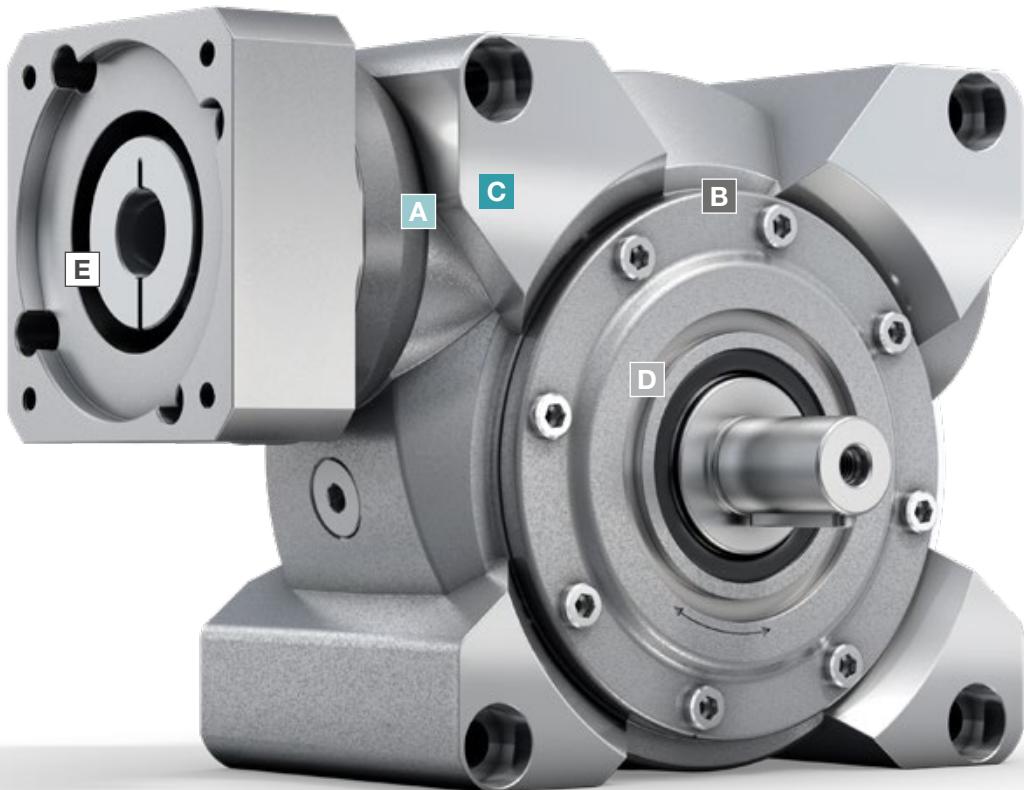

NVH – worm gearbox in corrosion-resistant design

NVS – worm gearbox with integrated planetary input stage

NVS

**A Radial shaft seal**

- Very long service life
- Optimized for continuous operation

**B Hollow-flank toothing**

- Medium torsional backlash accuracy over the entire service life
- High efficiency
- High power density

**C Input bearing**

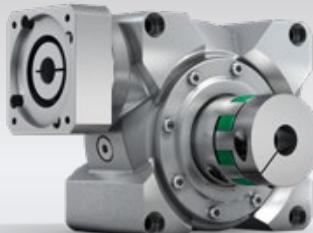

- Bearing package to absorb axial and radial forces
- Very well suited to high input speeds

**D Output bearing**

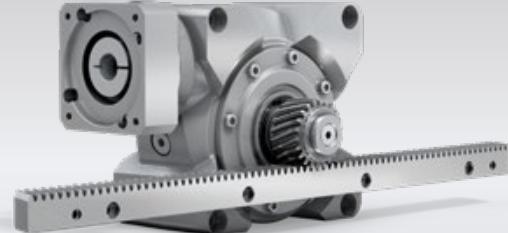

- High overload capacity to absorb axial and radial forces

**E Metal bellows coupling**

- Completely backlash free
- Lifetime durable and maintenance free
- Easy assembly
- Protects the motor through thermal linear expansion compensation

NVS – worm gearbox with elastomer coupling ELC

NVS – worm gearbox with rack and pinion

Involute gearing is not possible.

Motor shaft diameter [mm]

## Other output variants

Shaft with key

See technical data sheet for available clamping hub diameters (mass moment of inertia). Dimensions available on request.

Non-tolerated dimensions are nominal dimensions

<sup>1)</sup> Check motor shaft fit

<sup>2)</sup> Min./Max. permissible motor shaft length

Longer motor shafts are adaptable, please contact us

<sup>3)</sup> The dimensions depend on the motor

<sup>4)</sup> Smaller motor shaft diameter is compensated by a bushing with a minimum thickness of 1 mm
